Dr. Robert Gilbert is a counselor at Highland High School and demonstrated Noviance to the BAC. This software starts in 6th grade and has as several modules information on careers, how to identify your career choices, and how to research careers.

Noviance is used by Highland, Cloverleaf, Black River, and Brunswick. We are checking on the rest of the schools.

The Career Center uses OhioMeansJobs for their career education and the committee agreed it would be good to have a demonstration. OMJ Medina County will reach out to bring an expert to the March meeting.

Noviance is a very comprehensive tool that gave users quite a bit of career information. If OhioMeansJobs is found as comprehensive, the group has agreed we do not need to investigate career paths further.
